Operating mode

Design with mixing plug DN 15-150

Design with diverting plug DN 40-150 (Attention: reduced Kvs-values)

ARI-Control valves are suitable for use with pneumatic or electric actuators.

According to the application two different variations are possible (see drawings on the left)

Design with mixing plug as standard.

Select when the valve is used for mixing service (2 inlets, 1 outlet).

DN 15 - 32 with mixing plug can also be used for diverting service (1 inlet, 2 outlets).

In exceptions the design with mixing plug can also be used in diverting service for DN ≥40. Only small closing pressures are possible.

Design with diverting plug will be used exclusively for diverting service.
